Summary

I am a software engineer with fundamental knowledge in software design,development, and testing. Seeking to utilise broad educational background with excellent analytical technical, and programming skills to thrive as a software engineer.

Experience (0.5 years)

Python developer

- Working as backend developer with Django framework
  - ✓ Developed E-commerce site for client of property dealers with proper advertisement (client targeting the properties in Dubai).
  - ✓ Developed Blogging site (based on recently released gaming news) for client targeting gaming.
  - ✓ Developed E-commerce site for client targeting furniture market.
  - ✓ Developed a security software based on barcode scanning (Personals with authorized barcoded are only allowed to pass through security gate)

Education

Riphah International University Islamabad | 2017-2021
Bachelor in Sciences: Software Engineering | 3.3 CGPA
Relevant Courses: Object Oriented Programming, Data structure, Web-Programming, Database, Python, Information Security, Software quality testing

Final Year Project

Age-estimation using dental x-ray image: The idea was to create a deep learning model that will be able to estimate the age of person using dental x-ray image. Also, we provided a website for doctors and forensic agents to be able to use services to estimate the age of dead or in case of emergency. The Users could create account at our website and contact doctors and forensic agents for service
